Presentation of resources used for Pilot Phase

During the first phase of the AI4T project, the pilot phase, a range of resources were used/shared by the partners.

Some of these are brought together in this section in the following organisation

- All On-line resources and Moocs are gathered on a specific page: Other resources 2-1 moocs and on-line resources[1]
- Resources mentioned are all in English
- The resources should be relevant to the next phases of the project (the Large-Scale Experimentation Phase and then the Dissemination Phase) - some very interesting items have been left out of this section, e.g. they are only available in a language other than English.

---

1. Other resources: Mooc and Online ressources ↩
